

## Continuous Processing of Thin-Film Batteries and Like Devices

### Abstract of the Disclosure

5           A system for making a thin-film device includes a substrate-supply station  
that supplies a substrate having a major surface area. The substrate has a first layer  
on a first surface area of the substrate's major surface area. Also included is a  
device for depositing a second layer onto the first layer, wherein the device supplies  
energy to the second layer to aid in layer formation without substantially heating the  
10   substrate.
